

## TLS Request Form

Purpose: TLS can be used as an alternative to software Encryption. It is based on destination controls specified for a domain and can be used instead of software encrypting as long as a TLS connection is available. If there are entities that would like to initiate a TLS connection with the State of Wisconsin Enterprise E-mail System, please use the form below to provide the appropriate information and submit to: [postmaster@wisconsin.gov](mailto:postmaster@wisconsin.gov)

IT Contact Name: \_\_\_\_\_

IT Contact Phone Number: \_\_\_\_\_

IT Contact E-mail Address: \_\_\_\_\_

Domain Name: \_\_\_\_\_

Is your e-mail system hosted internally or externally? \_\_\_\_\_

If internally hosted, what application and version is being used? (i.e. Exchange 2007, Lotus Notes, Novell GroupWise): \_\_\_\_\_

What is your inbound and outbound SMTP gateway solution/s? (i.e. software or appliance solution, please include make and model or software version) \_\_\_\_\_

If hosted externally, please provide technical contact information including name, phone number and e-mail address: \_\_\_\_\_

Disclaimer: The Division of Enterprise Technology will only be responsible for configuring TLS on the State of Wisconsin Enterprise E-mail System. It is expected that the requesting entity or solution provider will have the expertise and responsibility to configure TLS on the requesting agency's systems.
